

Campaign on occupational and environmental cancer

Start campaigns in your own workplace (toxics reduction) STC has some good examples of this work.

Education in schools on smoking and exposure to carcinogens.

Talk to groups like Macmillian (like they have done in Scotland) or including prevention in their work on cancer in the workplace.

Any mileage in working with local councils (who have now a remit for public health) to get them to address primary prevention on the *health and wellbeing board*, and get a trade union rep co-opted on.

Does every Union have a Cancer Prevention Strategy? Unions could adapt Alliances Cancer Prevention Strategy and endorse, make relevant to them, and Scotland, Wales and NI.

TUC courses – cancer in the workplace – e notes on the website, they should include something on primary prevention.

Unions should join prison workers to put a motion to TUC on smoking in prisons, backed by hazards campaign.

Make sure than European ports are used by Russian ships.
